

Press Release 18th April, 2011

IPHONE 4 USERS TO BENEFIT FROM SUNTRICA'S SOLAR-POWERED CHARGERS: ALSO AVAILABLE FOR ALL MAKES OF SMARTPHONES, CAMERAS, LED TORCHES AND GPS DEVICES

Suntrica's stylish and practical solar-powered chargers are now available in two designs

- SolarStrap SS-W204 for the iPhone 4 and older Apple makes
- SolarStrap SS-W205 for all other cellular phones

With battery-hungry next generation phones playing an increasing role in our professional and personal lives, Suntrica's chargers are ideal for people who need to be connected, wherever they are. And best of all, despite being solar-powered, with the integrated battery pack they actually give you extra energy 24/7.

Suntrica's chargers can be used to charge every iPhone and iPod (SS-W204), all types of smartphones, cameras, torches and GPS devices (SS-W205). They are:

- Lightweight and compact (about the size of a small wallet).
- Virtually indestructible and able to operate in the harshest climates.
- Easy-to-use and require little actual sun.

The charger works by gathering solar energy using a flexible thin-film panel and storing the energy in an internal lightweight battery for either instant or later usage. The charger can also be charged using mains electricity or from laptop with an USB cable.

SolarStraps SS-W204 and SS-W205 are available in five colours (pink, blue, green, orange and black). Find your local distributor at our website (<http://www.suntrica.com/dealers.php>)

The global launch of both products will be conducted in co-operation with Systems Sunlight S.A., Greece.

About Suntrica

Suntrica Ltd. was founded in 2006 to develop and market portable solar chargers and charging solutions and has offices and distributors across the world including the US, Japan, China, Russia and Europe.
